

Agro ecology trail

Visit some farms in Uganda implementing Health soil health food initiatives

Concept of agro ecology trail

- AFSA is supporting Healthy soil Healthy food in Africa.
- RURAL COMMUNITY DEVELOPMENT (RUCID) is the organizing health soil health food center in Uganda.
- RUCID is mandated to conduct trainings for farmer trainers in promoting health soil health food initiatives in Uganda.
- RUCID is mandated too to follow up the trainers to assess the levels of success and verify the needs for improvement
- As a matter of fact in case anyone needs to see and witness agro ecology in Uganda it becomes necessary to have living examples
- That to be achieved, there must be a trail known as from one farm to the other this could be in the same locality or even from one zone to the other

Concept of agro ecology trail

- To date, the zones are according to different districts namely:
- Mityana
- Buyikwe
- Mukono
- Kasese
- Wakiso

Agro ecology trail

Welcome to KESAM farm and YUDNET, Buyikwe, District

Improving banana management for sustainable staple food production in central Uganda

Crops under agroecology management practices

Health crops managed using solid and liquid bio stimulants at KESAM farm with UYDNET

Growing health pumpkins on well managed soils with bokash and verim compost

Healthy passion fruits at KESAM farm in Buyikwe district on a healthy soil. High quality fruits and nutritious.

Tomatoes managed under agro ecological conditions with agro ecology principles meet minimum diseases and pests in the field. Food safety is ensured.

Micro and sustainable moisture management
in the soil using the clay pot

Increased productivity with application of bio inputs

Micro irrigation

Micro irrigation ensuring availability of moisture in the soil at all time.

Easy time management

Pumpkins managed with the help of soil amendmets

Mr. Kabuye Samuel training farmer at KESAM farm

And many more at KESAM farm

Kizigo village, Buyikwe District
